VV Case Study

Midton Acrylics Ltd

Since 2009 Viable Ventures Ltd (VV) has carried out Lean mentoring and consultancy contracts through Highlands & Islands Enterprise (HIE) to assist HIE-account-managed clients improve their productivity, profitability and growth potential. VV receives extremely positive feedback from these clients and a typical example includes Midton Acrylics Ltd in Argyll - "Europe's leading clear cast acrylic manufacturers" - specialising in manufacturing clear acrylics products, such as corporate awards.

Midton Acrylics were experiencing a period of rapid growth and so had introduced a second shift. They wanted to review their product planning and control techniques to ensure that they met the increase in customer demands and therefore maximise returns. The owners also wished to formulate an Exit Strategy.

VV carried out a detailed Software Production System Review and facilitated a Succession Management Review. The result of these Reviews was the successful identification of the need for definitive links between training plans, their critical staff and resources; this was also linked to a communications review and a workflow analysis. The Midton Acrylics team are now implementing the various recommendations.
